Summary

Passionate and dedicated fresher frontend developer with a focus on React.js. Seeking to leverage my skills in HTML, CSS, JavaScript, and React to contribute to a dynamic development team. Seeking a challenging position as a MERN Full Stack Developer where I can utilize my skills and knowledge to contribute to innovative projects while continuously learning and growing in a dynamic work environment.

Skills

- **Languages:** HTML, CSS, JavaScript
- **Framework:** React.Js(Axios, Context)
- **Library:** BootStrap, Tailwind CSS
- **Tools:** Git, GitHub, VS-Code

Projects

1. Animal Planet

- **Description:** Developed a website dedicated to educating visitors about wildlife conservation and the importance of protecting animals and their habitats. The website features information about endangered animals and their environments, aimed at raising awareness and promoting conservation efforts.
- **Responsibilities:**
 - Designed and implemented a responsive website layout using HTML, CSS, and Bootstrap to ensure a seamless experience across all devices.
 - Integrated Flickity to create a sleek sliding feature for showcasing information about endangered animals.
 - Created engaging and informative content about various endangered species and their habitats.
 - Ensured the website was visually appealing and user-friendly, focusing on clear navigation and interactive elements.

2. Softcadia

- **Description:** Softcadia is a dynamic and innovative job portal project aimed at connecting employers and job seekers within the tech industry.
- **Technologies:** MERN stack.
- **Responsibilities:**
 - Designed and implemented scalable server-side applications.
 - Contributed to the overall development of a full-stack web platform.
 - Integrate databases, such as MongoDB or MySQL, with Node.js applications.
